

CLINICAL XPERT™ HANDOFF

Clinical Xpert Handoff is a module of the **Clinical Xpert Navigator Suite** that helps to ensure precise patient hand-off from one caregiver to the next.

OVERVIEW: A RELIABLE TRANSITION

Clinical Xpert Handoff from the Healthcare business of Thomson Reuters promotes a streamlined and accurate patient handoff process by enhancing the communication and collaboration among cross-covering physicians and care teams. Handoff provides a centralized location from which clinicians can access a care team's handoff list via mobile device or desktop computer. With Handoff, each member of the team is able to track and edit a patient's diagnosis, code status, known allergies, health problems, and the clinician's task list with complete visibility into comprehensive patient data via Clinical Xpert Navigator.

By eliminating unreliable written communication (often on note pads or sticky notes) and streamlining the hand-off process, clinicians can save 1.5 to 3 hours per week. Handoff helps reduce medical errors by increasing the interaction and teamwork between caregivers, facilitating a seamless patient transition between clinicians, units, and shifts.

INTELLIGENT SIMPLICITY

Handoff is completely integrated into the Clinical Xpert Navigator suite, staying true to Navigator's intuitive interface and convenient mobility features. Additionally, Handoff employs a system that grows smarter with use by storing previously entered to-do items for common tasks that can quickly be recalled and selected.

HOW IT WORKS

Each caregiver subscribes to a team, giving them access to their team's hand-off lists to track and edit patient diagnoses, code statuses, allergies, and to-do items on their mobile device or desktop computer. As caregiver roles and responsibilities change, users may join or leave a patient care team as needed.

FEATURES

- Fully customizable Info Screen tracks patient diagnoses, code statuses, allergies, and pending tasks.
- Problem List management for historical and current diagnoses.
- Patient encounter history displayed for each care team member.
- Previously entered to-do items are stored for quick re-entry.
- Census List allows user to filter by outstanding to-do items.

BENEFITS

- Improves communication and coordination of patient care between cross-covering physicians and care teams through a centralized and streamlined hand-off.
- Reduces medical errors and duplicate test orders by providing access to treatment plans.
- Supports compliance with The Joint Commission and NCQA guidelines for patient safety and care.
- Allows for faster billing when integrated with Clinical Xpert Charge Capture.
